

The highly anticipated follow up to Ask The Experts 1 is OUT NOW.

ASK THE EXPERTS II | Oracle Films | CoviLeaks | 2021 BBC Panorama Response

In Ask The Experts 1, a highly qualified team of 30 medical experts worldwide presented their personal research based insights on the covid-19 vaccines. When it reached over 8 million views on mainstream social media and countless more shares and downloads worldwide it was censored and debunked without just reason.

The media stir prompted the BBC to put together a Panorama programme attempting to get behind the headlights of the speakers and the film makers.

Did they get behind the truth of the matter or score some own goals?

Decide for yourself.
